Tehran, Iran

PRODUCT DESIGNER

I'm a Product Designer with a background in fintech and crypto, focused on solving complex problems through simple, clear, and intuitive design. I work end-to-end — from understanding user needs and shaping user flows to creating prototypes that improve the overall experience. By combining qualitative insights, quantitative data, and AI tools in my design process, I build practical products that make sense to users, support business goals, and help products grow.

EXPERIENCES

Product Designer | [Twox.ir](#)

Feb 2025 - Present

Crypto exchange in Iran.

- Designed and launched Dust feature, enabling users to convert micro-assets, to reduce the support complaints and bringing low-activity users back to trading. [See more](#)
- Worked on redesigning the Deposit page and adding a clear deposit timeline, which helped reduce support chats by 70%. [See more](#)
- Worked on redesigning main pages like Profile, Home, Landing page, Market, and Coin page to make them look better and make the user experience easier and smoother.
- Building new features like Loan and Easy Buy & Sell and Dust to increase trading volume and new active users
- Building the Two-x Design System so the team ships more consistent work and designing Two-x's dark theme — extending the visual language across the product to give users a comfortable, low-glare experience without losing brand identity.
- Building the Virtual Credit game end-to-end with AI as a design+code partner, to increase new active users. [See Game](#) (Check With VPN)

COURSES AND CERTIFICATES

Product design | DigiNext Bootcamp

Oct 2024 - Jan 2025

A 4-month bootcamp focusing on user research, usability testing, wireframing, prototyping, and interaction design, using tools like Figma.

SKILLS

Research: Usability Testing, Interview, Competitive Analysis, Journey Mapping, Affinity Diagram

Problem Solving: Brainstorming, Wireframing, Prototyping, Interaction design, User flows, Information architecture, Responsive Design, Design System

Tools and Software: Figma, Photoshop, Illustrator, Clarity, GA, Jira, Base knowledge of Python

AI & Emerging Tools: Claude Code, ChatGPT, Nano Banana Pro, AI-assisted development, prompt engineering, AI workflow design

LANGUAGES

English: Professional working proficiency

French: Professional working proficiency
